

Tharsan Thanapathy

Full Stack Software Developer

647-713-4874 | tharsanthanapathy@gmail.com | [linkedin.com/in/tharsanthanapathy](https://www.linkedin.com/in/tharsanthanapathy)

Summary

Graduate full stack developer with strong experience working in **Agile** environments using **ReactJS** with **Node.js** to build clean and elegant websites and **Laravel** for building API endpoints.

Skills and Abilities

- **Languages:** Javascript, Typescript, Node.js, HTML, CSS, PHP, C#
 - **Technologies:** React, Laravel, MySQL
 - Can manage multiple demands within strict deadlines
 - Translate foundational skills to learn unfamiliar languages/software
 - Resourceful and quick to hit the ground running
-

Professional Experience

Idextrus

January 2022 - Current

Full Stack Developer Co-op

- Led the feature development, upkeep, and management of the admin frontend for an e-commerce platform
 - Developed frontend features using **ReactJS** with **Material.UI** component library alongside API calls to fetch and serve data
 - Created **API endpoints** on the **Laravel** backend using efficient **SQL** queries handling complex **big-data** cases
 - Worked in an **Agile team** completing weekly sprints using Pivotal Tracker and a feature roadmap, alongside actively contributing in Agile ceremonies
-

Education

Humber College

September 2020 - Current

Diploma in Computer Programming (Co-op)

- Dean's Honor Roll
 - Notable Courses: Relational DB Design and SQL, Java Application Development, Mobile Programming, Web Programming and Design, Framework Programming and Object Oriented Programming using Java
-

Highlighted Projects

Discord Twitter Bot

- Created a Discord Bot to solve the problem of Discord's implementation of Twitter embeds lacking critical information with quoted retweets
- Used **Javascript** and **Node.js** that uses Twitter's API to fetch and return parent tweet information
